

We all experience stress. Some stress, called positive or eustress, can help motivate us to move forward, reach our goals and, most importantly, to stay safe. However, a prolonged, high level of stress is negative stress, and it can compromise your health.

If unmanaged, stress can lead to depression, anxiety, and burnout. Log in to the TELUS Health One platform at any time to access a wealth of wellbeing tips information and exercises including:

• Stress management toolkit
