

# Flu Shot Information

The flu is a contagious respiratory illness caused by influenza viruses. The best way to help prevent the flu? Get vaccinated! The flu vaccine has been shown to reduce both flu-related illnesses and the risk of serious complications that can result in hospitalization.

Free flu shots are now available with most insurance plans (including Medicare) at your local **Publix Pharmacy!** Restrictions apply.

## **BOOK APPOINTMENT**

The Centers for Disease Control and Prevention (CDC) also recommends everyday preventive actions – such as covering coughs and sneezes and frequent handwashing – to help slow the spread of germs that cause illnesses like the flu. Learn more about the flu by visiting the [CDC's website](#).\*

\*By clicking the link above, you will leave [www.publix.com](http://www.publix.com) and enter the CDC's website that they operate and control.

State, age, or health restrictions may apply. See pharmacy for details.

Common symptoms of the flu include:

- Fever or feeling feverish/chills
- Cough
- Sore throat
- Runny or stuffy nose
- Muscle or body aches
- Headaches
- Fatigue

COVID-19 vaccines and other vaccines may be administered without regard to timing. That means you can get the COVID-19 v
